## PROJECTS

### • Pokemon Search Project

HTML, CSS, SCSS, JAVASCRIPT, REST API, RESPONSIVE WEB DESIGN

2023

- Developed a small application where the user can search any Pokemon the user wants. Returns the requested query. If query does not match the data in the API. It will return a message the query is not found.
- This project is built in MVC paradigm, classes (OOP), utilizing state, This application immensely helped me understand JavaScript as doing it on my own helped.

### • WWE Clone

JAVASCRIPT, RESPONSIVE WEB DESIGN, HTML/CSS

2022

- Recreated the official site of WWE. The gist is that I didn't like their desktop carousel. I came with a solution for the desktop that doesn't affect mobile/tablet users. It was my approach/idea for the carousel.
- This project is built with HTML/CSS, JavaScript. Made it responsive for mobile & tablet users using Media Queries.

### • Genshin Countdown Timer & Randomizer Minigame

JAVASCRIPT, HTML, CSS, RESPONSIVE WEB DESIGN

2022

- Developed a small application where it displays a countdown till the game goes into maintenance. The user can see how many days it will be. Once the initial countdown ends. A second countdown will automatically begin for the maintenance.
- Developed a side randomizer minigame. This project was a combination of two smaller projects into one.

## EDUCATION

### • Bachelor of Technology - Computer Information Systems

NEW YORK CITY COLLEGE OF TECHNOLOGY

2020-Present

### • Associate In Applied Science

NEW YORK CITY COLLEGE OF TECHNOLOGY

2017-2020
